

What is WebMoney?

WebMoney is an online payment system that allows you to transact with other WebMoney users or merchants, in a number of currencies.

Registered users manage their account using one of 2 free tools:

- **WM Keeper Classic** is standalone software installed onto your computer. To see what the software looks like, and how it works, visit the [WM Keeper Classic](#) page on the WebMoney site.*
- **WM Keeper Light** does not require software installation. You transact using an internet-browser, through a secure https connection. It is designed for clients who cannot or do not want to install the WM Keeper Classic. To use WM Keeper Light all you need to do is install a [WebMoney Transfer personal certificate](#) and start your browser.

Please also visit the [Help Desk](#) page of the WebMoney site to see demonstrations of how to register and manage your WM Keepers, as well as how to send and receive transfers.

Once you've registered and verified your account with WebMoney, you are free to create purses (dedicated currency-specific electronic wallets) within your WebMoney account.

You are now able to transfer funds from any of your purses to other WebMoney users and merchants – all you need is their purse number.

Please note that FxPulp only supports USD and EUR WebMoney purses at this time. For more information, please visit the [WebMoney](#) website.

How do I load my WebMoney purse?

There are a number of ways to load your WebMoney account (e.g. bank wire, pre-paid cards, cash exchange).

Please see [Adding Funds](#) for a list of funding methods available for your purse type and country.

How can I make deposits at FxPulp using WebMoney?

If you do not yet have a WebMoney account, please visit the WebMoney website to register an account and install a WebMoney Keeper. Alternatively, you can use a pre-paid WM-card, Payer cheque or WM-note to fund your FxPulp account directly.

What will it cost me to use WebMoney at FxPulp?

WebMoney charges a 0.8% fee, of no less than 0.01WM, for transferring funds. (WM Units have a 1:1 relationship with the currency of your purse. Therefore, 0.01WM in a USD purse is equal to USD\$0.01.)

The maximum transaction fee for a USD purse is 50WM.

For detailed information on fees, please visit the [WebMoney Fees](#) page.
